

Smart Features

Remote Control

With the convenience of a remote control, you can adjust the level of light or shade for your outdoor space with ease, converting your outdoor space into a desirable living space.

Smart Sensor

Our unique engineered patio cover systems come equipped with Smart Climate Sensors, which can detect changes in the weather and adjust the louvers accordingly. This means you have the chance to enjoy your outdoor space in any season, without worrying about rain, snow, or wind damage.

Smart Touch

Our engineering team went above and beyond to make sure that you can control your patio cover with ease, using your smartphone or tablet. Our app is available and supported with both Apple or Android systems.
